

DRIVEEASE CAR RENTAL SYSTEM

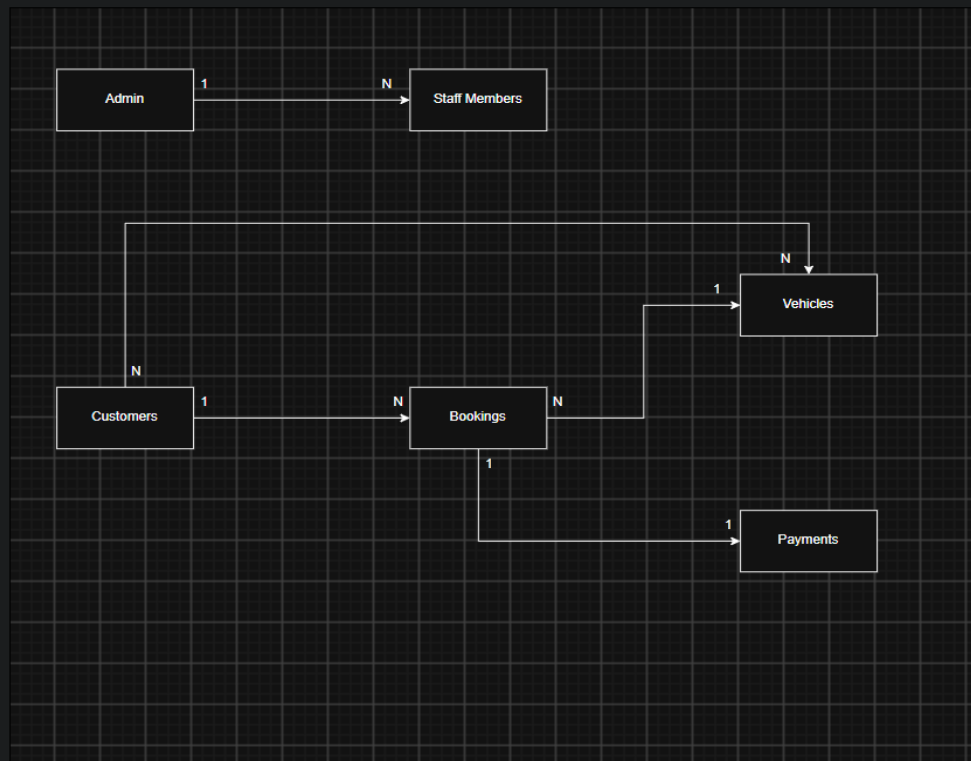

DriveEase Car Rental System has administrators, staff members, customers, vehicles, bookings, and payments.

A customer can create many bookings, but each booking belongs to one customer. Each booking is made for one vehicle, while a vehicle can be included in many bookings over time. A booking has a booking date, pickup date, return date, rental amount, and booking status.

Staff members manage customer information, vehicle availability, booking confirmations, vehicle pickup, and vehicle returns. One staff member can manage many bookings, but each booking is handled by one staff member.

Administrators manage staff accounts, customer records, vehicle details, rental prices, and payment reports. An administrator can manage many staff members, vehicles, and bookings.

Each booking has one payment, and each payment belongs to one booking. A payment has a payment ID, amount, payment date, payment method, and payment status.
